ONLINE BANKING SYSTEM

ABSTRACT

Introduction:

When it comes to daily errands, the online banking system has made it way easier for many of its customers as well banks and other financial institutions and organizations. With banks being just a few clicks away; online banking allows customers to access their bank accounts from anywhere; 24/7 securely and conveniently. A new age online banking system allows customers to conduct day-to-day money transfers, direct deposits, bill payments to be carried out efficiently with utmost ease and comfort. With the concept of banking turning online, the users can keep a good eye, monitoring all their balance and pending transactions in real-time.

The main aim of this project is to design and develop a database for the bank to maintain records of various branches of the bank across the country, administrators' details as well customers' account details, account statements, transaction details, loan details (if availed by the customer) and bill payments in order to nurture the needs of an end banking user by providing various ways to perform banking tasks online.

Functionalities of the system:

Online banking is a multi-faceted system that involves the collaboration of multiple domains like engineering and management. To facilitate this, our online banking system has multiple modules which help both the administrators and the customers. Administrators manage the customer details and at the same time track and modify the amount in the customers' account. While the customers on the other hand, can create either savings or current account or both and proceed with their transactions, bill payments, applying and availing for loans. Also, the customer can view his/her own account details, account statement and all other details regarding transactions, loans, bill payments in their personal online account. Initially, while creating an account in the bank, the new customers are provided with a register link and the existing customers with a log-in link to access their account securely.

Online banking services the customers can avail:

- Customers can deposit money into their saving accounts for which banks pay them a certain interest.
- Customers are provided with loans for which customer has to pay interests.
- Customers can transfer money to any other bank account across different banks or to different branches of the same bank.
- Customers can avail debit/credit card from the bank, linking it up with their respective accounts.

Modules in the system:

- Interface creation for Online banking system.
- Register/Log-in by customers to access their bank accounts (savings or current or both)
- Maintaining records of deposition, transactions by customers and customer details.
- Issuing receipts, OTP(s) and mails for transactions.
- Maintaining records of administrators' details.
- Maintaining records of loans availed to customers.
- Debit/Credit card services
- Maintaining records of bill payments (electricity bills, water bills, municipal bills, credit/debit card bills, etc.)
- Report generation.

Benefits of the system:

The deployment of our system will ensure convenient and secure transactions, thereby providing maximum support to both the customers and administrators.

Development platform:

- For Database - SQL
- For User Interface – HTML, CSS and JavaScript.

SCHEMA

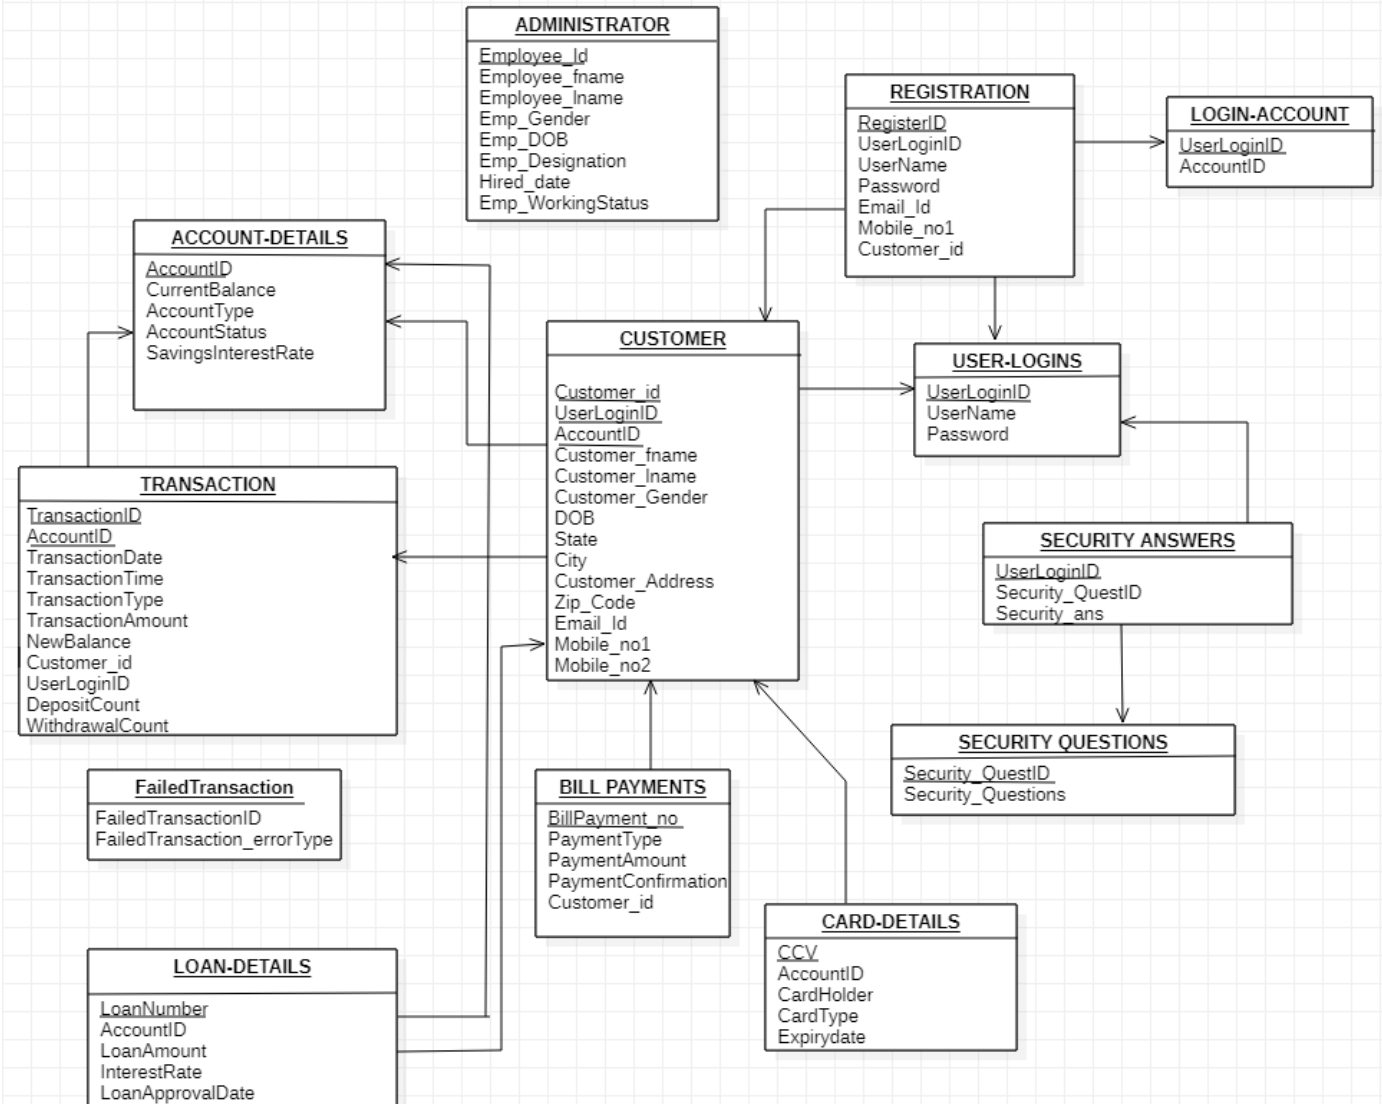

Online Banking System

An online banking system that allows users to manage their transactions and other banking tasks; online. // This database is designed to maintain records of various kinds of events, users registered for a particular event, total users registered, records of transactions made by users. //

Database Schema:

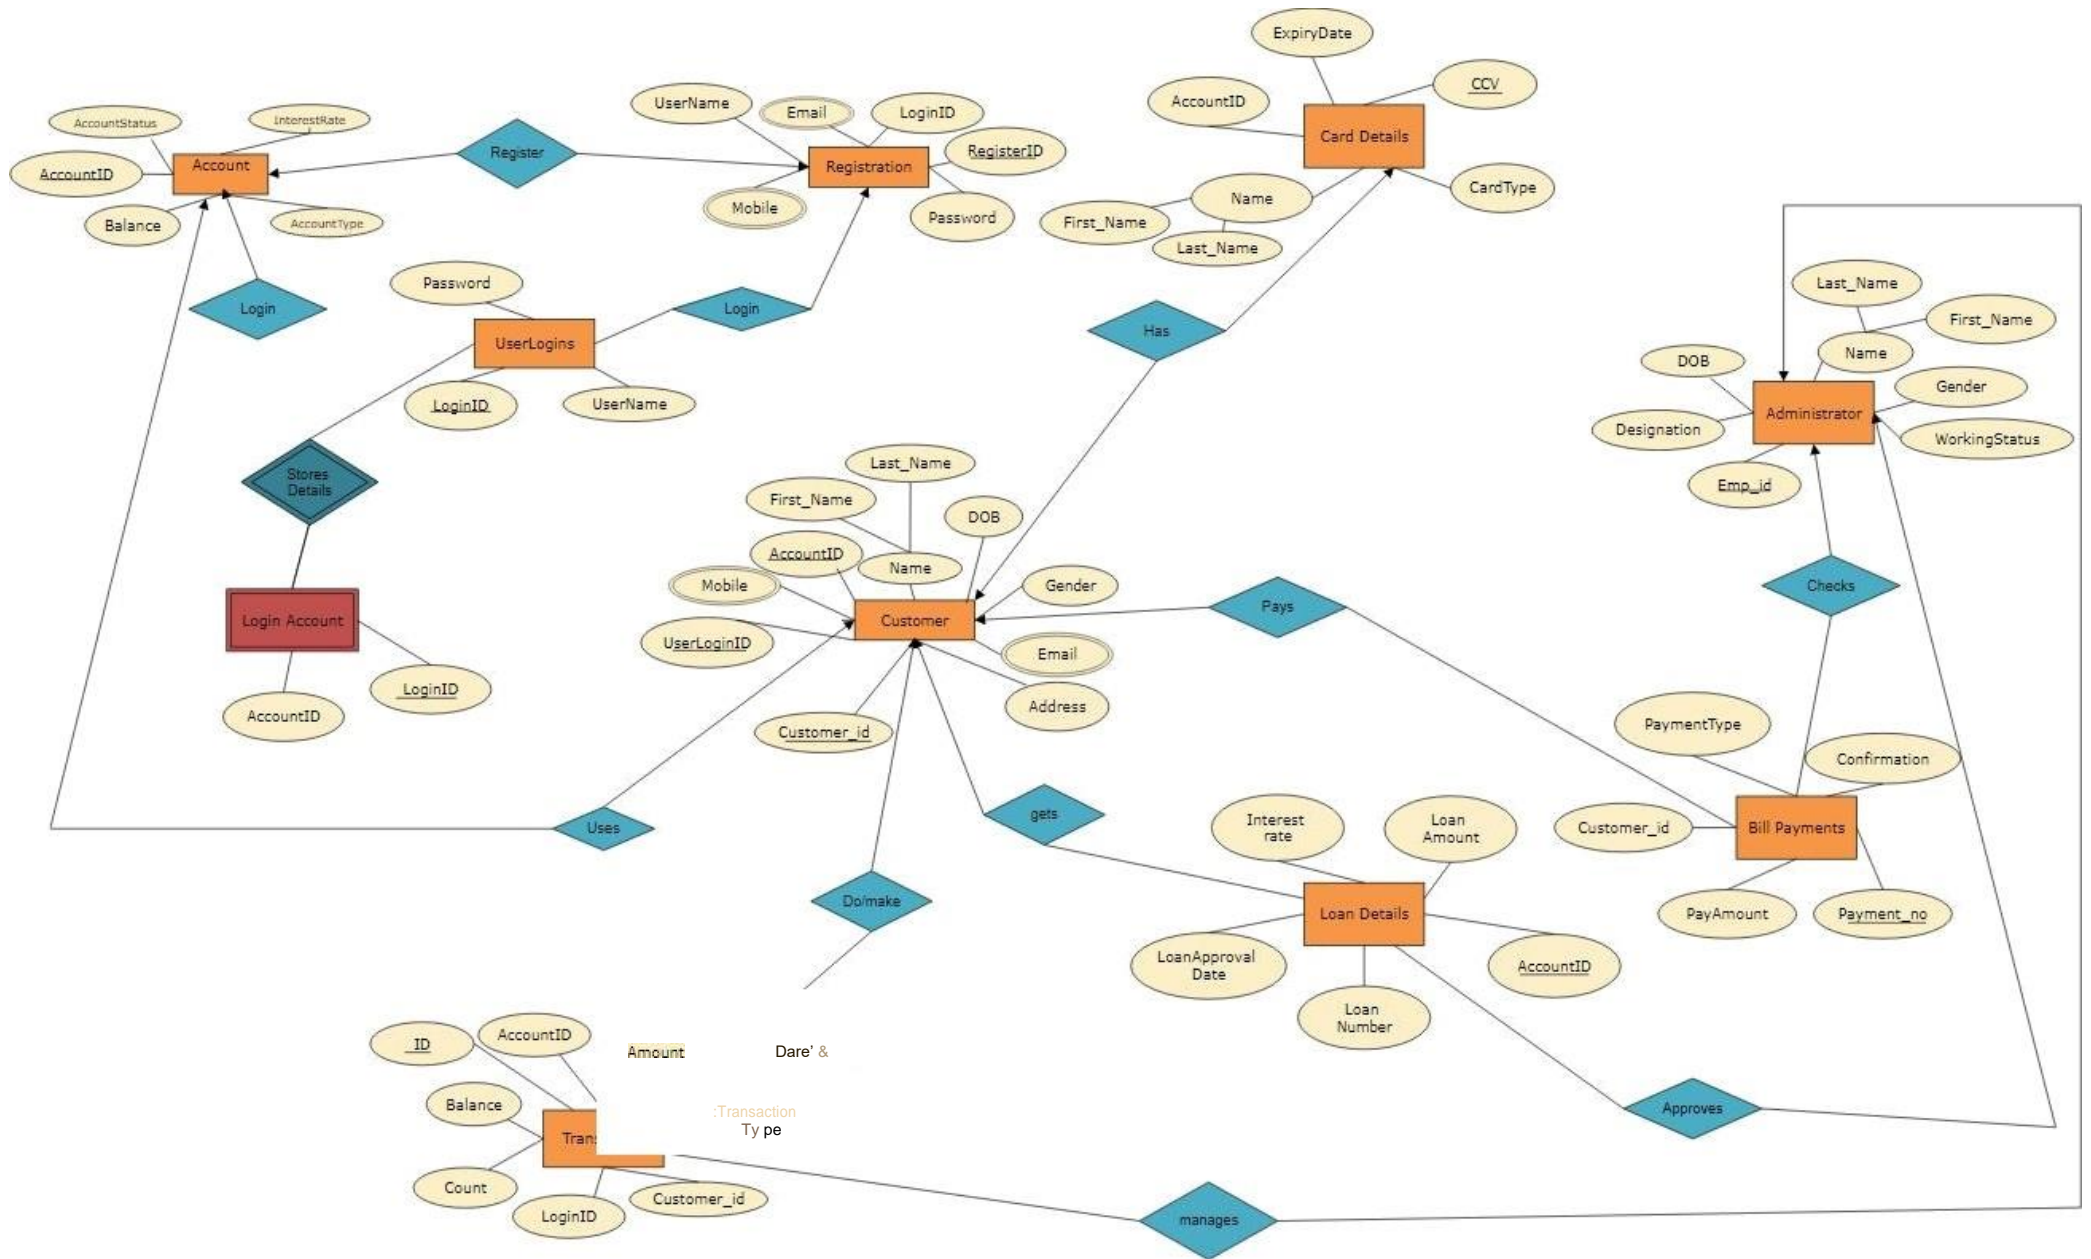

- 1) **ADMINISTRATOR** (Emp_id, Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Hired_date, Emp_workingStatus)
- 2) **CUSTOMER** (Customer_id, AccountID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, State, City, Customer_Address, Zip_code, Email_Id, Mobile_no1, Mobile_no2, UserLoginID)
- 3) **ACCOUNT-DETAILS** (AccountID, CurrentBalance, AccountType, AccountStatus, SavingsInterestRate)
- 4) **REGISTRATION** (RegisterID, UserName, UserLoginID, Password, Email_Id, Mobile_no1)
- 5) **LOGIN-ACCOUNT** (UserLoginID, AccountID)
- 6) **USERLOGINS** (UserLoginID, UserName, Password)
- 7) **SecurityAnswers** (UserLoginID, Security_Ans, Security_QuestID)
- 8) **SecurityQuestions** (Security_QuestID, Security_Questions)
- 9) **TRANSACTION** (TransactionID, TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, AccountID, Customer_id, UserLoginID, WithdrawalCount, DepositCount)
- 10) **LOAN-DETAILS** (LoanNumber, AccountID, LoanAmount, InterestRate, LoanApprovalDate)
- 11) **CARD-DETAILS** (AccountID, CardHolder, CardType, CCV, ExpirtDate)
- 12) **BILL-PAYMENTS** (BillPayment_no, PaymentType, PaymentConfirmation, PaymentAmount, Customer_id)
- 13) **FailedTransactionLog** (FailedTransaction_errorType, FailedTransactionID)

NORMALISATION

TABLES BEFORE NORMALISATION:

- 1) ADMINISTRATOR (Emp_id, Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Hired_date, Emp_workingStatus)
- 2) CUSTOMER (Customer_id, AccountID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, State, City, Customer_Address, Zip_code, Email_Id, Mobile_no1, Mobile_no2, UserLoginID)
- 3) ACCOUNT-DETAILS (AccountID, CurrentBalance, AccountType, AccountStatus, SavingsInterestRate)
- 4) REGISTRATION (RegisterID, UserName, UserLoginID, Password, Email_Id, Mobile_no1)
- 5) LOGIN-ACCOUNT (UserLoginID, AccountID)
- 6) USERLOGINS (UserLoginID, UserName, Password)
- 7) SecurityAnswers (UserLoginID, Security_Ans, Security_QuestID)
- 8) SecurityQuestions (Security_QuestID, Security_Questions)
- 9) TRANSACTION (TransactionID, TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, AccountID, Customer_id, UserLoginID, WithdrawalCount, DepositCount)
- 10) LOAN-DETAILS (LoanNumber, AccountID, LoanAmount, InterestRate, LoanApprovalDate)
- 11) CARD-DETAILS (AccountID, CardHolder, CardType, CCV, ExpiryDate)
- 12) BILL-PAYMENTS (BillPayment_no, PaymentType, PaymentConfirmation, PaymentAmount, Customer_id)
- 13) FailedTransactionLog (FailedTransaction_errorType, FailedTransactionID)

MASTER SCHEMA:

BANK(Emp_id, Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Hired_date, Emp_workingStatus, Emp_Mobile, Customer_id, AccountID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, State, City, Customer_Address, Zip_code, Email_Id, Mobile_no, UserLoginID, AccountID, CurrentBalance, AccountType, AccountStatus, SavingsInterestRate, RegisterID, UserName, Password, Security_Ans, Security_QuestID, Security_Questions, TransactionID, TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, WithdrawalCount, DepositCount, LoanNumber, LoanAmount, InterestRate, LoanApprovalDate, CardHolder, CardType, CCV, ExpiryDate, BillPayment_no, PaymentType, PaymentConfirmation, PaymentAmount, FailedTransaction_errorType, FailedTransactionID)

1 NF:

Multivariable attributes: TransactionID, Mobile_no, Emp_Mobile, LoanNumber, BillPayment_no.

Table 1:

BANK(Emp_id, Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Hired_date, Emp_workingStatus, Customer_id, AccountID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, State, City, Customer_Address, Zip_code, Email_Id, UserLoginID, AccountID, CurrentBalance, AccountType, AccountStatus, SavingsInterestRate, RegisterID, UserName, Password, Security_Ans, Security_QuestID, Security_Questions, TransactionID, TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, WithdrawalCount, DepositCount, LoanNumber, LoanAmount, InterestRate, LoanApprovalDate, CardHolder, CardType, CCV, ExpirtDate, BillPayment_no, PaymentType, PaymentConfirmation, PaymentAmount, FailedTransaction_errorType, FailedTransactionID)

Table 2:

Cus_Mobile (Customer_id, Mobile_no)

Table 3:

Emp_Mob(Emp_id, Emp_Mobile)

Table 4:

Loan_num(Customer_id, LoanNumber)

Table 5:

Transact (AccountID, TransactionID)

Table 6:

Bill (AccountID, Bill_payment_no)

2 NF:

Master Schema is decomposed and all the partial dependencies are identified,

1) ADMINISTRATOR (Emp_id, Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Hired_date, Emp_workingStatus)

Functional Dependencies:

(Emp_id) \twoheadrightarrow (Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Emp_workingStatus, Hired_date)

2) CUSTOMER (Customer_id, AccountID, UserLoginID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, State, City, Customer_Address, Zip_code, Email_Id, Mobile_no)

Functional Dependencies:

(Customer_id) \twoheadrightarrow (AccountID, UserLoginID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, State, City, Customer_Address, Zip_code, Email_Id)

3) ACCOUNT-DETAILS (AccountID, CurrentBalance, AccountType, AccountStatus, SavingsInterestRate)

Functional Dependencies:

(AccountID) \twoheadrightarrow (CurrentBalance, AccountType, AccountStatus, SavingsInterestRate)

4) REGISTRATION (RegisterID, UserName, UserLoginID, Password, Email_Id, Mobile)

Functional Dependencies:

(RegisterID, UserLoginID) \twoheadrightarrow (UserName, Password, Email_Id, Mobile)

5) TRANSACTION (TransactionID, TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, WithdrawalCount, DepositCount)

Functional Dependencies:

(TransactionID) \twoheadrightarrow (TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, WithdrawalCount, DepositCount)

6) LOAN-DETAILS (LoanNumber, LoanAmount, InterestRate, LoanApprovalDate, LoanType)

Functional Dependencies:

(LoanNumber) \twoheadrightarrow (LoanAmount, InterestRate, LoanApprovalDate, LoanType)

7) CARD-DETAILS (CardNumber, CardHolder, CardType, CCV, ExpirtDate)

Functional Dependencies:

(CardNumber) \twoheadrightarrow (CardHolder, CardType, CCV, ExpirtDate)

8) BILL-PAYMENTS (BillPayment_no, PaymentType, PaymentConfirmation, PaymentAmount)

Functional Dependencies:

(BillPayment_no) \twoheadrightarrow (PaymentType, PaymentConfirmation, PaymentAmount)

9) FailedTransactionLog (FailedTransaction_errorType, FailedTransactionID)

Functional Dependencies:

(FailedTransactionID) \twoheadrightarrow (FailedTransaction_errorType)

10) USERLOGINS (UserLoginID, UserName, Password)

Functional Dependencies:

(UserLoginID) \twoheadrightarrow (Username, Password)

PARTIAL DEPENDENCY:

11a) Security_Anss (UserLoginID, Security_QuestID, Security_Ans)

Functional Dependencies:

(UserLoginID, Security_QuestID) \twoheadrightarrow (Security_Ans)

11b) Security_Quest (Security_QuestID, Security_Questions)

Functional Dependencies:

(Security_QuestID) \twoheadrightarrow (Security_Questions)

3 NF:

Further the decomposed master schema should be segregated on the basis of transitive dependency.

1) ADMINISTRATOR (Emp_id, Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Hired_date, Emp_workingStatus)

Functional Dependencies:

(Emp_id) \twoheadrightarrow (Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Emp_workingStatus, Hired_date)

2) ACCOUNT-DETAILS (AccountID, CurrentBalance, AccountType, AccountStatus, SavingsInterestRate)

Functional Dependencies:

(AccountID) \twoheadrightarrow (CurrentBalance, AccountType, AccountStatus, SavingsInterestRate)

3) REGISTRATION (RegisterID, UserName, UserLoginID, Password, Email_Id, Mobile)

Functional Dependencies:

(RegisterID, UserLoginID) \twoheadrightarrow (UserName, Password, Email_Id, Mobile)

4) Security_Anss (UserLoginID, Security_QuestID, Security_Ans)

Functional Dependencies:

(UserLoginID, Security_QuestID) \twoheadrightarrow (Security_Ans)

5) Security_Quest (Security_QuestID, Security_Questions)

Functional Dependencies:

(Security_QuestID) \twoheadrightarrow (Security_Questions)

6) TRANSACTION (TransactionID, TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, WithdrawalCount, DepositCount, OldBalance)

Functional Dependencies:

(TransactionID) \twoheadrightarrow (TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, WithdrawalCount, DepositCount, OldBalance)

7) CARD-DETAILS (CardNumber, CardHolder, CardType, CCV, ExpirtDate)

Functional Dependencies:

(CardNumber) \twoheadrightarrow (CardHolder, CardType, CCV, ExpirtDate)

8) BILL-PAYMENTS (BillPayment_no, PaymentType, PaymentConfirmation, PaymentAmount)

Functional Dependencies:

(BillPayment_no) \twoheadrightarrow (PaymentType, PaymentConfirmation, PaymentAmount)

9) FailedTransactionLog (FailedTransaction_errorType, FailedTransactionID)

Functional Dependencies:

(FailedTransactionID) \twoheadrightarrow (FailedTransaction_errorType)

10) USERLOGINS (UserLoginID, UserName, password)

TRANSITIVE DEPENDENCY:

11a) LOANTYPE (Loan_Type, InterestRate)

Functional Dependencies:

(Loan_Type) \twoheadrightarrow (InterestRate)

11b) LOAN-DETAILS (LoanNumber, LoanAmount, LoanApprovalDate, LoanType)

Functional Dependencies:

(LoanNumber) \twoheadrightarrow (LoanAmount, LoanApprovalDate, LoanType)

12a) CUSTOMER (Customer_id, AccountID, UserLoginID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, Customer_Address, Email_Id, Mobile_no)

Functional Dependencies:

(Customer_id) \twoheadrightarrow (AccountID, UserLoginID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, Customer_Address, Email_Id, Zip_code)

12b) State_city(City,State)

Functional Dependencies:

(City) \twoheadrightarrow (State)

12c) Zip (Zip_code, City)

Functional Dependencies:

(Zip_code) **7** (City)

BCNF:

All the tables are in BCNF.

FINALIZED TABLES:

- 1) ADMINISTRATOR (Emp_id, Emp_firstName, Emp_lastName, Emp_Gender, Emp_DOB, Emp_Designation, Hired_date, Emp_workingStatus)
- 2) CUSTOMER (Customer_id, AccountID, UserLoginID, Customer_firstName, Customer_lastName, Customer_Gender, DOB, Customer_Address, Zip_code, Email_Id, Mobile_no)
- 3) ACCOUNT_DETAILS (AccountID, CurrentBalance, AccountType, AccountStatus, SavingsInterestRate)
- 4) REGISTRATION (RegisterID, UserName, UserLoginID, Password, Email_Id, Mobile)
- 5) SECURITY_ANSS (UserLoginID, Security_QuestID, Security_Ans)
- 6) SECURITY_QUEST (Security_QuestID, Security_Questions)
- 7) TRANSACTION (TransactionID, TransactionDate, TransactionTime, TransactionType, TransactionAmount, NewBalance, WithdrawalCount, DepositCount, OldBalance)
- 8) State_city (City, State)
- 9) Zip (Zip_code, City)
- 10) LOANTYPE (Loan_Type, InterestRate)
- 11) LOAN_DETAILS (LoanNumber, LoanAmount, LoanApprovalDate, LoanType)
- 12) CARD_DETAILS (CardNumber, CardHolder, CardType, CCV, ExpirtDate)
- 13) BILL_PAYMENTS (BillPayment_no, PaymentType, PaymentConfirmation, PaymentAmount)
- 14) FailedTransactionLog (FailedTransaction_errorType, FailedTransactionID)
- 15) USERLOGINS (UserLoginID, UserName, password)

- 16) Cus_Mobile (Customer_id, Mobile_no)
- 17) Emp_Mob (Emp_id, Emp_Mobile)
- 18) Loan_num (Customer_id, LoanNumber)
- 19) Transact (AccountID, TransactionID)
- 20) Bill (AccountID, Bill_payment_no)

CREATION OF TABLES AND INSERTION OF RECORDS:

[Feedback](#) [Customer Care](#) [About](#)

Frequently Asked Questions (F.A.Q.)

1. What is Online United Bank?

Online United Bank is the Internet banking service provided by United Bank Authorities, India's largest and premier commercial bank.

2. What is special about Internet banking?

Internet banking is the most convenient way to bank - anytime, any place, at your convenience.

3. I do not have a PC?

You can access Online United Bank from any computer that has connectivity to the Internet. But make sure your computer is Malware free.

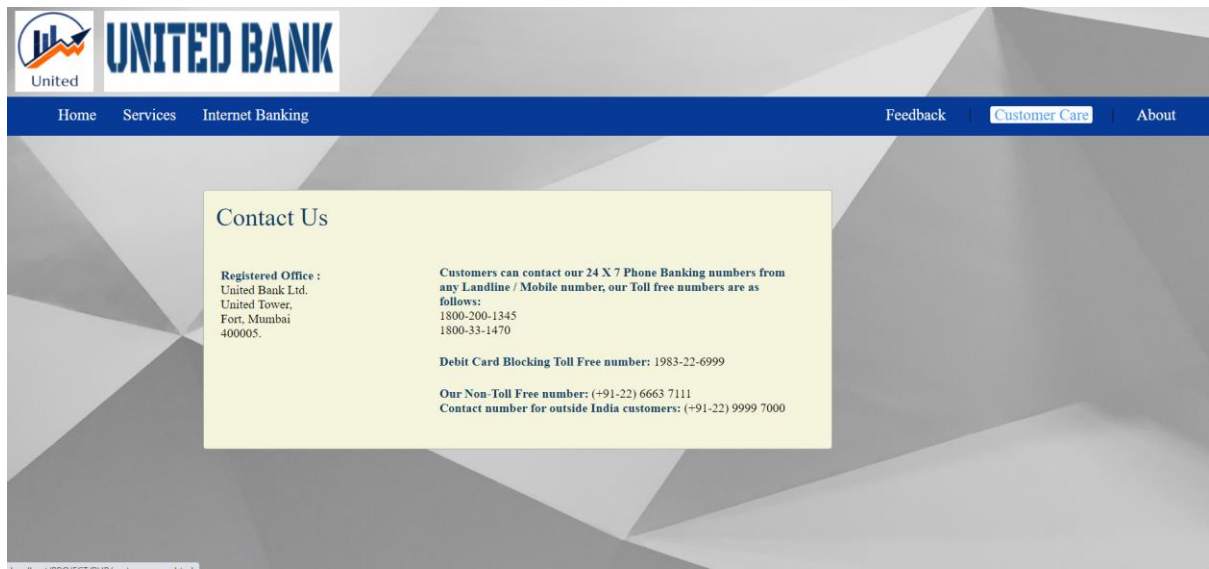

4. How do I access Online United Bank?

You need to have an account at a branch. You also need to register for the Internet banking service with the branch. Branch will provide you a Pre Printed Kit (PPK) containing username and password for first login. If you are not in a position to collect PPK in person, the bank will arrange to send a username through SMS and a mailer containing password to your registered address. Logon to our website using this username and password. At the first login, you will need to go through a simple initialization process. Our Net banking assistant will guide you step by step through this process on the site.

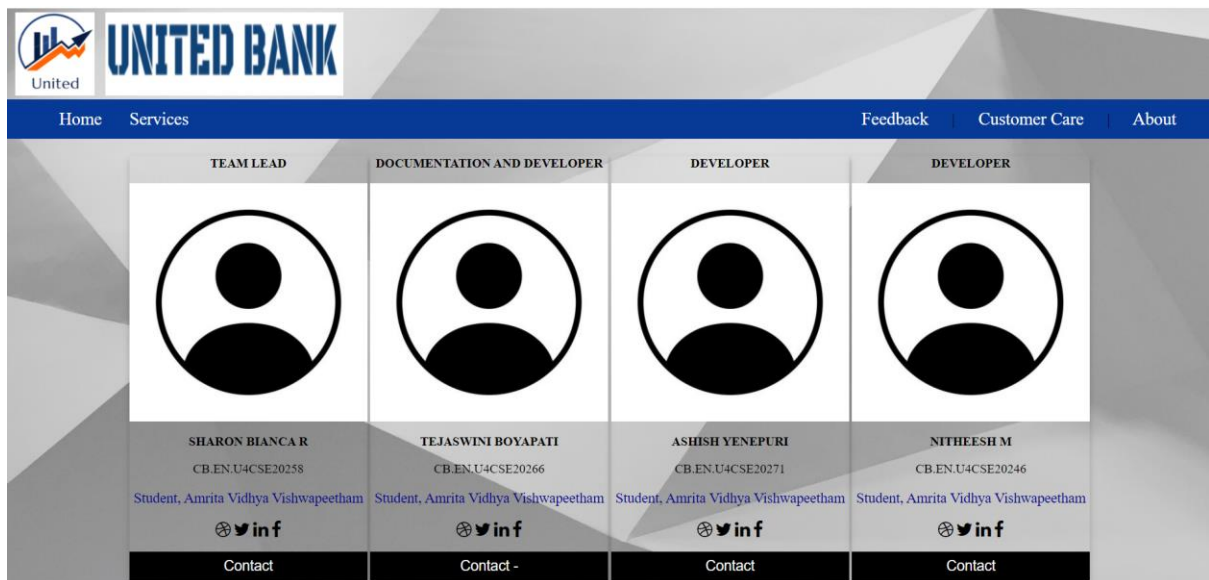

5. I do not have an account with United Bank?

You are welcome to open it now. It is very easy to open an account with United Bank. You can apply online for opening of a savings bank account. A link 'Online SB Account Application' is available on the home page of our website or just walk in to any of our branches nearby. Our staff would be pleased to assist you.

    Frequently Asked Questions (F.A.Q.)
</div>
<div id="faq_questions">
    <table id="faq_table" style="border-collapse: collapse;">
        <tr class="question">
            <td>1. What is Online United Bank?</td>
        </tr>
        <tr>
            <td>Online United Bank is the Internet banking service
provided by United Bank Authorities, India's largest and premier commercial
bank.</td>
        </tr>
        <tr class="question">
            <td>2. What is special about Internet banking?</td>
        </tr>
        <tr>
            <td>Internet banking is the most convenient way to bank -
anytime, any place, at your convenience.</td>
        </tr>
    </table>

```

```
<tr class="question">
  <td>3. I do not have a PC?</td>
</tr>
<tr>
  <td>You can access Online United Bank from any computer
that has connectivity to the Internet. But make sure your computer is Malware
free.</td>
</tr>
<tr class="question">
  <td>4. How do I access Online United Bank?</td>
</tr>
<tr>
  <td>You need to have an account at a branch. You also need
to register for the Internet banking service with the branch. Branch will
provide you a Pre Printed Kit (PPK) containing username and password for first
login. If you are not in a position to collect PPK in person, the bank will
arrange to send a username through SMS and a mailer containing password to
your registered address. Logon to our website using this username and
password. At the first login, you will need to go through a simple
initialization process. Our Net banking assistant will guide you step by step
through this process on the site.</td>
</tr>
<tr class="question">
  <td>5. I do not have an account with United
Bank?</td>
</tr>
<tr>
  <td>You are welcome to open it now. It is very easy to
open an account with United Bank. You can apply online for opening of a
savings bank account. A link 'Online SB Account Application' is available on
the home page of our website or just walk in to any of our branches nearby.
Our staff would be pleased to assist you.</td>

```

CONCLUSION

In order to deal with the banking tasks online, a database to record all the details is very much needed along with a user interface for both the ends to interact. This platform is designed to serve as a one-stop solution for both the customers and administrators.

The main aim of this project is to design and develop a database for the bank to maintain records of various branches of the bank across the country, administrators' details as well customers' account details, account statements, transaction details, loan details (if availed by the customer) and bill payments in order to nurture the needs of an end banking user by providing various ways to perform banking tasks online.

➤ **Elucidating important features of the project:**

- Interface creation for Online banking system.
- Register/Log-in by customers to access their bank accounts (savings or current or both)
- Maintaining records of deposition, transactions by customers and customer details.
- Issuing receipts, OTP(s) and mails for transactions.
- Maintaining records of administrators' details.
- Maintaining records of loans availed to customers.
- Debit/Credit card services
- Maintaining records of bill payments (electricity bills, water bills, municipal bills, credit/debit card bills, etc.)
- Report generation
